TRIBUNE TOWER ARCHITECTS GET MEDAL OF HONOI

Competition Is Urged for \$15,000,000 Hall.

Raymond M. Hood and John M. Howells were presented with the gold medal of honor of the Chicago chapter, American Institute of Architects, for their design and execution of The Pribune Tower last night. This is the fifth time such an honor has been concerned in the last twenty years.

Mr. Hood, to whom the presentation was made at a meeting of the Chicago chapter in the University club, enforced competition as the only fair method of letting contracts for architectural work on major public buildings. His remarks followed a lively liscussion of the \$15,000,000 Chicago Hall.

Leaders Award Honor.

The Tribune Tower design, the winner in an international competition held by This Tribuna, had been awarded the medal of honor by a jury of high standing architects who considered buildings throughout Illinois which have been erected within the last five years. The jurors were: the president of the Chicago chapter, A. I. A., the president of the Illinois Society of Architects, the president of the Architectural Sketch club of Chicago, and four architects appointed by the Chicago chapter, Edward H. Clark, Howard L. Cheney, Frederick Hodgdon and Russell Walcott.

Mr. Hood said he would ask the American Institute of Architects at its next national meeting to endorse competition as the proper method of letting architectural contracts for public work. Leaders Award Honor.

ON DAWES PLAN

Claim Wages Kept Down by Hidden Profits.

BY GEORGE SELDES.

BY GEORGE SELDES.
[Chiese Tribuse Free Service.]
ERLIN, Sept. 13.—Throughout
many the campaign against the
ree' plan has been renewed intensty following the report of Seyir Parker Gilbert, agent general for
arations payments, on the third
cossful year of the plan's operair. From everywhere the Manufacary association is hearing reports
the Dawes' plan is ruining Ger-

many.

Whenever strikes are threatened, such as the present coal miners' strike, the Dawes' plan comes up as the specter with which to frighten the discontented into submission.

However, a survey, which the American trade and consular agencies call correct, shows Germany is prosperous, business is splendid, unemployment has dirginished, many people are getting rich, and what is more important from the American viewpoint, Germany, by charging ridiculously high prices for products at home, is underselling the United States and Great Britain in world markets.

Farmers Pay Heavy Taxes.

Oppressive taxes are put upon the farmers. The junkers, in turn, treat the tenant farmers in the meanest way. The coal miners are forced to work from 10 to 12 hours a day for \$1.50. Labor throughout Germany is worse off than it was before the war.

If you ask a German manufacturer the reason for all this, or a shopkesper why food and clothes are more expensive than in the rest of Europe, they have but one answer: "The Dawes plan is ruining Germany. Germany is paying out billions to foreign countries."

Shows 90 Per Cent Pay Profits. But all this, according to investiga-on and according to experts who are sident here, is buncombe and camou-age. Without being willing to predict the working out of the Dawes plan the future, they are certain that day Germany is quite well off, and all the howling and whining is used to

circling plane, Pride of Detroit, in its hangar today. Owing to the breakdown of telegraphic and telephonic communication all efforts to get in contact with William S. Brock and Edward F. Schlee from Tokio have failed, but one report said they hoped to start for Tokio tomorrow.

Newspaper men who passed through Nagasaki yesterday evening en route between Shanghal and Tokio, obtained from Schlee the bald statement they still intend to fly to the Midway islands in their attempt to cross the Pacific ocean. The airmen are almost the only two men in Japan who are not ready to admit the attempt is utterly foolhardy, but several factors must be considered before their reported decision is accepted as final.

No Gas Supply at Island.

No Gas Supply at Island. were convicted on ten counts of mail frauds in connection with their land deals. Maj. Kramer, who is 62, and who was referred to by the prosecution as a "white collared bandit," is said to be the inventor of "No-Tobac," an asserted cure for the tobacco habit, and the man who first put "Cascarets" on the market. He sold his interest in the product several years ago.

No Gas Supply at Island.

One is they have not yet seen the newspapers or that handful of cables awaiting them in Tokio. Then their supplies of gascline and oil have not reached Midway. The island contains two Fords and has somewhat casual supplies of gas, but there is no aviation gas there. The weather has broken and the Pacific typhoon season

not forced down, but simply missed the island and flew until their gas was exhausted. Schlee's decision will have to be made finally when he has had the opportunity of studying these facts.

"Strongly advise against Schlee and Brock attempting hazardous Midway islands-Hawaiian Pacific hop," the cable read. "Strong general sentiment here they should not endanger fine record by attempting such an extra hexard."

Similar messages have been sent by Mayor John W. Smith and Harvey Campbell, secretary of the board of commerce. In addition Campbell last night wired the Dallas (Tex.) chamber of commerce asking withdrawal of the \$50,000 prize for the first air plane flight from Hongkong to Dallas.

CHICAGO'S IDEAL WEATHER.

WE LEAVE IT TO THE JUDGE. Chicago, has heard more divorce cases and signed how our judge explained to his European brothers the fact that in this country a man and wife cannot be divorced if that is what they both want. We can see the European eyebrows rise. "What better reason can there be for granting a divorce than the fact that a man and woman dislike each other cordially and cannot bear to live together?" Judge Sabath must have been asked. We do not know what his answer was, but it should have been that in this respect our law is absurd.

The American theory of divorce can be justified only as an historical relic or a bit of legalistic phistry. The fact is that the law is observed in the breach and judges continually close their eyes to collusion. We hope that one result of Judge Sabath's tour will be a recommendation from him for a thorough revision of the Illinois divorce code stand the position of those who oppose all divorces but we cannot follow those who believe in divorce best of all grounds.

THE PREACHERS AND THE FIGHT.

Presbytery have both gone on record as opposing the Dempsey-Tunney fight. They say the fight encourages brutality and gambling. We do not with them, but we believe it is not only their privilege but their duty to point out the moral issue, as they see it, to their parishioners.

The preachers have wisely refrained from at-tempting to stop the fight. We hope they will continue their present line of conduct and not ator principle was a breakfast table topic for the tempt again to use political machinery to prohibit professional pugilism or any other line of conduct to which they object on moral grounds. Colombia to suppress a revolution which broke out in what is now Panama but then was a part of Colombia. Roosevelt has been severely criticized by liberals for intervening at the time at the expense of Colombian sovereignty, but that is hardly a matter of which Panamanians can complain. They owe what sovereignty they enjoy to the United States; and they owe prosperity and health to the United States, which built the canal and annihilated tropical diseases in their land. Miss Roberts says it is very difficult for a rapidly growing, hard playing child to get all the calories and growth because he calories and growth elements he actually needs in the remaining two meals. A 14 year old child, full of pep and growing rap-idly, needs about five thousand calories if a boy's stomach will accommodate that much, divided into two takes. Even McAdoo Men Don't Assail N. Y. Governor.

BY ARTHUR EVANS.

Nashville, Tenn., Sept. 12.—[Special.]—Politicians in this part of Tennessee are saying if Gov. Al Smith of New York is turned down by the national convention it may wreck the bemoreatic party in the north, while if he is nominated for President he may lose some of the dry south.

With the Democratic donkey thus caught between Beelasebub and the deep, blue sea, some party leaders are expressing a tentative opinion that parhaps the best way out is to put fmith on the ticket. If he wins, well and good, while if he loses, all the hangover from the controversy over Voisteadism and the Ku Klux Klan at Madison Square Garden three years ago will be wiped out and the party will be ripe and ready for a reorganization for 1932.

Walting for Cat to Jump.

Few of them are openly declaring for any candidate, and agost of the politicians shudder when asked if they have made any commitments, it being too early to detect which way the cat will jump. But in this part of the south one outstanding feature just now is a growing, disposition on the part of some of the old McAdoo men to put in a kind word for Smith.

The impression is being voiced that Smith appears likely to roll up a majority in the early balloting, they don't say they will go so far as to throw votes towards Smith, as this would preselphites a hot crop of local political fights in the district but in general they are taking the ground if the New Yote Sweeper strikes a fast paic in the convention they won't strew any stones in his path and if he comes within striking distance, the dry south might even give him enough delegates to land the necessary two-thirds.

How Politicians Argue.

Opinion even among the politicians still is vague and uncrystalized, but a composalite line of argument zathered

Opinion even among the politicians still is vague and uncrystalized, but a composite line of argument gathered from talks with party chiefs and observers in Nashville shapes up at present something like the following:

1. No candidate is centralising the opposition to Smith as did McAdos in 1824. Tennessee cast its 24 vates for

is no outstanding candidate to drape it over.

2. Smith is regarded as the great vote getter and the one man in the party who might carry parts of the east. Old McAdoo men here say he is by all odds the outstanding figure among the Democratic candidates.

3. As to wet and dry, they point out Gov. Ritchie of Maryland and Senator Reed of Missouri are wets, as is Smith. At San Francisco, the pleadings of William J. Bryan did not keep the party from naming Cox as a wet.

It leaves the religious issue as Smith's chief obstacle, they argue, and if he is rejected, they contend, it will cause Catholic Democrats in the north to here! cause Catholic Democrats in the north to break away in resentment and bring

New Triumphs in 3 days for the STUDEBAKER COMMANDER

Three times within three days the superior performance of Studebaker cars has been demonstrated by spectacular and convincing achievements.

In every phase of motor car performance-speed-mountain climbing-endurance-The Studebaker Commander, listing at \$1495, definitely out-performed all other cars selling for less than \$2500.

Here is what The Commander has done since September first:

September 2nd, established a new transcontinental record—from New York Harbor to San Francisco Bay in 77 hours, 40 minutes. Ab Jenkins, a building contractor of Salt Lake City, made the record in a stock Commander 4-door Sedan, fully equipped!

September 5th, won first and second places in the great 75-mile Labor Day race for stock cars at Atlantic City Speedway-averaging 85.95 and 84.58 miles per hour, respectively! This race was under supervision of the American Automobile Association, open to all cars selling for less than \$2000. Two Studebaker Commander Roadsters finished first and second, with a Chrysler "72" third. Other entrants were Buick Master Six, Nash Advanced Six, Hudson Super Six, Chrysler "70" and Star Six.

September 5th, second in Pikes Peak climb to top of world's highest motor road—only 48 seconds behind a Stutz listing at three times The Commander price. This stock car race was also under American Automobile Association supervision.

such facts as these are stubborn things which cannot be explained away by mere unsubstantiated claims of performance. No wonder The Commander is known as "the greatest achievement of post-war automotive engineering" and is outselling the combined totals of all other cars in the world of equal rated horsepower.

You Never See Gasoline

It goes into your tank through a hose-you take it on trust. You can't examine it. Only a chemist can analyze it. The brand and the company back of the brand are all you have to go on.

If you buy unbranded gasoline, you buy a product which no company vouches for. You may save a few pennies in the purchase price, but it will cost you more in the end.

It is wiser to buy a known product—a branded product—with the backing of a company with a reputation to sustain. Your car represents a big investment. It is worthy of your care. It requires dependable fuel.

You are protecting your car investment to the utmost when you buy Red Crown Ethyl Gasoline or Red Crown Gasoline. The Standard Oil Company [Indiana] is back of them. It is proud to claim them and proud to assume responsibility for the way they work in your car.

Red Crown Ethyl Gasoline makes the engine quick to obey, powerful, speedy and smooth. It costs a few cents more but it "knocks out that knock".

Our famous economy fuel, Red Crown Gasoline, will give you a maximum of power at a minimum of expense without the anti-knock factor.

It pays to buy brands known for dependability-Red Crown Ethyl and Red Crown.

ow Boston's shrewdest merchants sell their market

MONG Boston's department store managers are numbered many of the most successful merchants in the country—some of them national authorities on sound and aggressive marketing methods.

These men know the Boston market - and know how to reach it. Their actions can be studied with profit by all who look for greater sales volume in the Boston territory.

Boston's department stores concentrate their selling in Boston's 12-mile trading area. Here they make 74% of their package deliveries. This area is Boston's Key Market—the greatest concentration of people and wealth in New England.

How the Globe covers this buying group

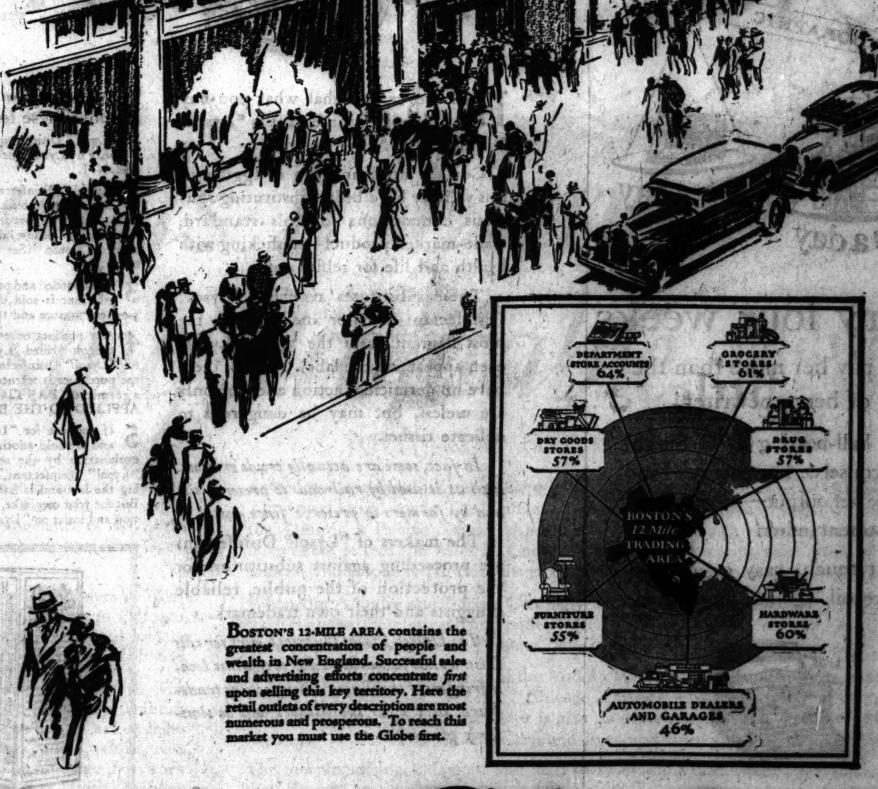

TN this Key Market the Sunday Globe delivers more circulation than any other Boston paper. And the daily Globe circulation exceeds that of the Sunday Globe. That is why Boston's department stores use the Globe first-daily and Sunday. The daily Globe carries more department store advertising than any other Boston paper. The Sunday Globe carries more than the three other Boston papers combined.

The Globe has attained and held this position of leadership because it appeals to all classes of Boston people regardless of race, creed or political views. It is the only Boston paper to hold a uniform circulation in the metropolitan area seven days out of every week.

To men the Globe offers general news, editorials and sports, free from bias or favoritism.

To women the Household Department is a daily guide in thousands of New England homes.

Merchants who know Boston have found that the Globe's readers constitute the buying group in this territory. That is why the Globe is the backbone of successful advertising efforts directed at the Boston market.

NE recognized test, when it comes to selling merchandise to women, is the experience of chain stores, most of whose customers are women. How this test works out when it comes to the Chicago market is shown by the experience of two of the most successful chains operating in Chicago—the Walgreen Company and the Great Atlantic and Pacific Tea Company.

Five years ago saw the start of The Tribune's performance as a sales builder for Walgreen. At that time - 1922 - C. R. Walgreen, then owner of 22 drug stores in Chicago, decided to try newspaper advertising. For his first year's campaign, he placed lineage as follows: Tribune, 26,681; American, 15,940; Herald-Examiner, 1,728; News, 10,538.

Results, however, prompted a quick change. And the change continued-with The Tribune pulling more and more into the lead-until, by the end of 1926, The Tribune had been given a total of 685,772 lines -118,253 more than all the other newspapers combined. And the number of Chicago stores had increased from 22 to 75, while gross revenues had grown from \$1,815,752.33 in 1921 to \$11,896,986.00 in the Chicago Territory in 1926-655.2% of the former volume—a growth won in five years, with Tribune

space the backbone of the advertising

campaign!

Commenting on this success Mr. C. R. Walgreen says: "The Walgreen organization fully realizes the big part played by The Chicago Tribune. My own opinion is best expressed by the size of our Tribune advertising appropriation."

That Walgreen's experience was not exceptional is proved by the experience of another great chain store organization—the Great Atlantic and Pacific Tea Company. This company, operating 1400 grocery stores in Chicago, recently con-

ducted a three months' test to determine which morning newspaper was pulling best. They used keyed ads in The Tribune, the Herald-Examiner, and their own house organ, the Atlantic & Pacific News. Hundreds of letters came in response to these ads, and from these letters the A. & P. Company learned an amazing fact: 69% of all its customers who responded to this advertising in three media answered through The Tribune.

When the Atlantic and Pacific Company learned the full pulling power of The Tribune, they changed their advertising policy. From January 1st to date they have used more lines of advertising in The Tribune than in any other Chicago newspaper!

Arthur G. Hoadley, president of the Middle Western division of the Great Atlantic and Pacific Tea Company, writes: "Chicago Tribune advertising is not only an effective way of securing cash results, but it is also an excellent medium in which to build future business . . . The Chicago Tribune lives up to and goes beyond our expectations."

The merchandising judgment and skill of these companies cannot be questioned. What they do sets up guideposts which any thoughtful advertiser should consider in plan-

ning his campaign in Chicago and the Chicago Territory. And their experience points to the same conclusion that any close and accurate analysis of the Chicago situation will reveal: that the tendency to concentrate Chicago newspaper advertising appropriations in The Tribune is logical and justifiable.

OMEN are living longer than they ever did before. In 1910 the average length of life

of women was 53.24 years. In 1925 it was 59.57. Yet who would ever suspect it?

Jean Lanvin, the Paris designer of woman's clothes, recently remarked, "There are no old women in the United States. They are all young, and

they wear their clothes better than any women in the world."

Women are looking more youthful because their labors are lighter and their lives more interesting. Thanks to modern laborsaving aids, women have more leisure for recreation and their personal appearance.

Then, too, women's clothes are more youthful. The short skirt is youth personified, and

all styles are designed with an eye to slenderizing. Other nota-

ble influences that are keeping them young are short hair and cosmetics. In the last ten years the knowledge of health rules, of diet, of the proper use of treatments for eyes, hair, skin—cosmetics and other beauty aids—

has enabled millions of wome to remain youthful in look and in spirit who former were old at forty.

Interstate Iron & Steel Company

54% First Mortgage Sinking Fund Gold Bonds

Interest Payable Without Deduction for Normal Federal Income Tax not in Excess of 2%.

The following has been summarised by Mr. Paul P. Llowellyn, President of the Company, from his letter describing this insue

Purpose of Issue: The proceeds of this issue will provide funds for substantial additions now being made to the Company's productive capacity.

History and Business: The Interstate Iron & Steel Company, incorporated under the laws of Illinois in 1905, corporated under the laws of Illinois in 1905, owns and operates three plants in the Chicago district, with combined capacity of about 400,000 tons of finished products per annum. Extensions to the Company's plant now being made will increase this capacity substantially. It manufactures carbon steel and alloy steel ingots, blooms and billets, iron and steel bars and shapes, wire rods and nails, and wire products generally, and is one of the two largest producers of Open Hearth Alloy Steels in the country.

Security: These 514% First Mortgage Sinking Fund Gold Bonds, Series B, will be a direct obligation of the Company, and will be secured together with the Series A bonds, in opinion of counsel, by a direct first mortgage on all the fixed property of the Company. The mortgaged property and the machinery and equipment have been independently appraised as of August 15, 1927, at a net sound value of \$12,425,104.56. This valuation is exclusive of

further plant additions to be made in part out of the proceeds of this financing, which additions will be subjected to the lien of the mortgage.

Earnings: Net Earnings of the Interstate Iron & Steel Company, after all charges including depreciation and interest on indebtedness other than bonded debt, applicable to the payment of bond interest and Federal income taxes, as independently certified, for the five and one-half years ended June 30, 1927, averaged \$995,904 per annum, equivalent to over 3.4 times the maximum annual interest requirement of \$291,500 on the First Mortgage Sinking Fund Gold Bonds of the Company now outstanding of \$291,500 on the First Mortgage Sinking Fund Gold Bonds of the Company now outstanding in the hands of the public and those to be issued at this time. Average annual earnings for the ten and one-half years ended June 30, 1927, were equivalent to 3.3 times this interest requirement, and earnings for the year ended December 31, 1926, were equal to more than 4.3 times this interest requirement. The foregoing ratios of earnings to bond interest do not take into secount any benefit to the Company from the proceeds of this financing.

Sinking Fund: The Trust Indenture and Supplemental Indenture securing these bonds will provide for the retirement through a Sinking Fund of \$3,242,000 of Series A and B, First Mortgage Bonds before maturity.

These banks are offered subject to prior subs, when, as and if insued and received by us, and subject to approved of asserted. All legal details in connection with this issue will be approved by Arthur B. Schaffeer, Esq., as counsel for the bankers, and Massrs. Neuman, Popperhauen, Storn & Johnston, as counsel for the Company. It is expected that permanent banks of the Company will be delivered on or about September 28, 1927.

FIRST WISCONSIN TRUST COMPANY and GEORGE B. LUHMAN, Milwaukee, Wisconsin, Trustees. have summarized from an accompanying letter of Mr. Cyrus C. Yawkey, President of the Company, as follows:

We have summarized from an accompanying letter of Mr. Cyrus C. Yawkey, President of the Company, as follows:

HISTORY AND The MARATHON PAPER MILLS COMPANY was organized in 1909 by a group of Wisconsin capitalists

with an original capitalization of \$50,000 of Common Stock. A plant of concrete brick and steel construction designed as a complete paper making unit was built at Rothschild near Wausau, Wisconsin.

This plant now has a capacity of 110 tons of sulphite, 12 tons of ground wood pulp and 138 tons of paper. The paper produced is high grade wrapping and bond paper. This paper, because of its strength and clean and pleasing appearance, is especially suitable for converting into paper products such as food containers.

The supply of pulp wood is amply protected through ownership of 52,399 acres of timber land in Michigan and 12,635 acres in Wisconsin, a total of 65,034 acres. At the present time pulp wood is purchased in the market under favorable arrangements. It is estimated that these sources of supply will take care of the Company's requirements for over seven

MENASHA PRINTING
The MARATHON PAPER MILLS COMPANY has acquired the assets of the Menasha Carton Company and its subsidiary, the Lake Superior Paper Company. The Menasha Company, with plants at Menasha, Wausau, Baltimore and Ashland, is one of the largest producers in the Unital States of paraffined food containers and waxed paper products. Inasmuch as the Menasha Company formerly bought about 40% of the output of the Marathon Company, this consolidation should prove of great

PURPOSE OF The funds received from the sale of these bonds will be used in part for the acquisition of the property and assets of the Menasha Printing & Carton Company and the Lake Superior Paper Company; in part for the retirement of \$1.447,000 total outstanding First and Refunding 6% Serial Gold Bonds of the Marathon Paper Mills Company and \$944,600 total outstanding First Mortgage 6½% bonds of the Menasha Printing & Carton Company; and for other corporate purposes.

SECURITY: These bonds will be a direct obligation of the MARATHON PAPER MILLS COMPANY and will be secured by a direct first mortgage lien upon substantially all of the physical assets of the Company and the Lake Superior Paper Company. The trust agreement will contain strict provisions regarding the issuance of additional bonds.

EARNINGS: The average annual consolidated net earnings ofter depreciation and income taxes for the last four and one-half years were \$1,037,235 or more than 4.7 times maximum annual interest requirements of \$220,000 on this issue. For the first six months of 1927, interest was earned over 5.6 times.

APPRAISALS: The sound value of the properties of the Menasha Printing & Carton Company have been determined by the American Appraisal Ompany at over \$1,900,000. The sound value of the properties of the Marathon Engineer, New York City, at \$6,000,000.

Based upon sales of like properties, the timber lands owned by the Company located in the state of Wisconsin are estimated to be worth over \$609,000.

BALANCE SHEET: The consolidated balance sheet of the Company as of June 30, 1927, but after giving effect to this financing, is attached. The current assets of the COMPANY are \$3,268,194 and current liabilities are \$714,522. The balance sheet shows net tangible assets of \$9,364,964 or \$2,341 for every \$1,000 bond to be outstanding. YAVE OF SELLING

BY CHARLES MICHAELS.

An avalanche of stop loss selling hit the wheat and corn markets at the opening, with wheat off as much as \$4.65% and corn \$5.65% from the lands mish of the previous day, with the December and March deliveries selling at a new low on the crop. December wheat sold down to \$1.29 and corn to \$2.20 the latter showing 25c under the secent high. Selling was general and advirdual operations counted for lit. the, with the Canadian government report suggesting \$43,000,000 bu more than a month ago, the depressing influence in wheat, while in corn decidedly favorable weather was the smain factor.

The break brought in aggressive short suggesting in grains, with wheat rallying 5%5% from the inide figures and closing at the top, with net losses of \$463% to with September \$1.27% 17% and December \$1.27% 1.27% 1.25%

Many traders felt that the Canadian povernment report has overestimated the wheat crop, and that view was also

Liquidation, which has been on in corn for several weeks, was strongly in evidence at the start, with support lacking until December broke to around 93c, sithough the opening range was 9246 bc. Buying against daily and weekly beds and short covering by houses that have been on the bear side for a number of weeks checked the break. At the maide figure prices were 244623c under the recent high, which many regarded as sufficient decline for the time being, and this view was largely responsible for the sail.

Deutsche Bank

Five-Year 6% Note

(Represented by American Participation Certificates)

To be dated September 1, 1927

A substantial portion of this issue has been withdrawn for offering in Europe.

The following information has been nummarized by Mr. Alfred Blinzig and Mr. Oscar Wassermann, Managing Directors of Deutsche Bank, from their letter dated September 13, 1927, copies of which may be obtained upon request, and is subject to the more complete information contained therein:

COMPANY AND BUSINESS

Deutsche Bank was organised in 1870 with its principal office in Berlin. With the exception of the Reichsbank, it has for more than forty years been the largest bank in Germany with respect to volume of business and deposits. The bank conducts a general domestic and foreign banking business in the broadest sense, including deposits, discounts, commercial credits and an extensive investment banking business. It has been instrumental in the development of many important industries in Germany and is closely connected with most of the leading industrial and commercial enterposes in that country. Deutsche Bank maintains offices in 174 cities, many of which in turn have a number of branch offices.

CAPITALIZATION AND EQUITY

This \$25,000,000 Five-Year 6% Note is to be the direct obligation of Deutsche Bank and will comprise, upon issuance, its only funded debt (except \$201,879 of revalorized mortgages on certain office buildings of the bank). The present authorized and outstanding par amount of the bank's share capital is \$35,700,000. Current quotations on the Berlin Stock Exchange indicate a market value for this capital of more than \$55,000,000.

DIVIDENDS AND EARNINGS

Dividends have been paid for each year since organization of the bank in 1870, with the exception of the inflation year 1923, and, with that exception, since the year 1895 have never been less than 10% per annum. Profits as reported by the bank, after deduction of interest, all taxes, and payments to the Supervisory Board, for the years 1924, 1925 and 1926, were \$4,346,409, \$3,996,319 and \$5,773,518, respectively.

Conversions of German into United States currency have been made at par of exchange.

Information herein contained has been received in part by cable.

GRANT BUILDING First Mortgage Leasehold

7% Sinking Fund Gold Bonds Due August 1, 1947 These bonds will be secured by a first closed mortgage on

the 99-year leasehold and a modern 35-story office building to be erected at Grant Street, 3rd and 4th Avenues, an excellent downtown site in Pittsburgh, Pennsylvania. Highest local and national authorities confirm the demand for first-class office space in Pittsburgh. In the rental esti-

mates for this building a figure of \$3.25 per average square foot has been used, whereas old buildings in Pittaburgh are actually renting for \$4.00 and over per square foot.

Competent independent appraisals place the bond issue at less than 60% of the value of the completed property. Two of Pittsburgh's leading real estate authorities estimate

the annual net earnings at more than 3.6 times the maximum annual interest on these bonds. The building is exceptionally well sponsored. National

Surety Company guarantees completion, free of lien, and further guarantees annual income to the amount of \$500,000. A sinking fund will retire 54% of the loan by maturity. We'recommend these bonds as a sound investment offering an unusually attractive income.

FACTS and FIGURES versus GUESSWORK

The judicious investment of surplus funds depends today, more than ever, upon the facts and figures of dependable information and the discarding of the antiquated methods of guess and hope.

A monthly report of business conditions, showing graphically the trends in eighteen vital branches of finance, business and industry, is one of this organization's contributions to the cause of fact and figure investing.

Our aim is not to prognosticate the future nor to influence the opinions of our customers through this medium. We merely aim to present a panorama of pertinent facts from which, with a minimum of study, one can better form proper judgment of the business trend.

Church Bonds

Experience has proven that Church Bonds, of the older Church Bonds, of the older denominations, are never affected by Realty fluctuations, or business depressions; churches are nearly always built of steel, brick, stone and concrete, therefore the depreciation is very slight. Church properties are tax free, and receive support from practically three-quarters of our entire population. In our fifty-seven years of investment experience church bonds with the Heinemann mark have never been known to fail.

Kroehler Manufacturing.

T. H. C.—The Kroehler Manufacturing company is a large manufacturer of uphoistered living room furniture, having an annual production of approximately \$20,000,000.

Its \$4,000,000 of 5½ per cent debentures are direct obligations of the company, but are not secured by any mortgage.

They, however, constitute its only funded debt and are issued under an agreement that no mortgage shall be created on any present property or assets without equally securing these debentures.

The consolidated financial statement as of Dec. 31, 1926, adjusted to give effect to this financing, shows net current assets of \$5,187,420 and net tangible assets of \$5,771,601, or \$2,192 for each \$1,000 debenture.

Consolidated net earnings, after depreciation, but before federal income taxes, for the last five years have averaged \$1,786,192.

taxes, for the last five years have averaged \$1,786,192.

For 1926 such earnings were \$2,612,457.

This is equal to 11.4 times the maximum annual interest charges on these debentures and over 4 times the combined maximum annual interest and maturity charges.

These debentures mature \$400,000 annually Jan 1, 1929 to 1938 inclusive.

They are a high grade investment suitable for a business man's funds.

ser. She entered and found the room empty, but the faint sound of splashing lidd her that Connie was still in her bath.

It was a brightly lighted room and the plan of concealing herself under Connie's bed seemed impracticable. Looking round her eye lighted on the half open French window that gave on to the balcony, and then came inspiration. She set the tray on the little table by the bed. Then she opened the door and herself standing still, shut it again. The clatter of the latch, she knew, would penetrate to Nurse Flecker's room and give her the impression that the had come into the room, set down the coccoa and left the room. Thirteen has always been considered an unlucky number. But yesterday, while the mercury in the thermometer was playing around in the nineties, heat and 13 were well associated.

There were contributions received yesterday for The Triguns free ice fund from thirteen towns and cities outside of Chicago. Nine of these were from Illinois. The roll call was Lake Forest, Evanston, Oak Park, Riverside, West Chicago, Ottawa, Chatsworth, Berwyn and Rockford.

Boone and Cedar Rapids were the Iowa representatives. New Carlisle, Ind., and Byran, O., sent in their donations to bring relief to families in a city many miles away.

Many Chicagoans, too, turned from that good show, in order to put them into his new venture, "Manhattan Mary," wherein they will be associated with Ed Wynn, Miss Elizabeth Hines, and other some-bodies and well-knowns of the comic bodies and well-knowns of the comic form today onward by the Misses McCarthy in the Scandals will be occupied from today onward by the Misses Williams, also sisters: one is named Dorothy. It seems that they were in an earlier issue of the Scandals—the aixth: that was the one shown in 1924-'25 in the Selwyn.

There is talk of moving "The Barker" into the Illinois when, the night of the 24th, it will have used up all the time allotted to it in the Black-stone, where its successor will be the

TRIBUNE COOK BOOK

BY JANE EDDINGTON. On Blanching Vegetables

Iters something like this have been received: "At the risk of asking a non-intelligent question, I am going to make an inquiry that has long puzzled me, namely, about blanching vegetables. Why, for instance, must the cabbage be plunged in bolling water for five minutes before adding it to the soup, as mentioned in your rule for vegetable soup? I should think this would take out the mineral salts, but this is mere surmise."

We think that the loss of mineral salts in the blanching of vegetables

We think that the loss of mineral salts in the blanching of vegetables is but slight in most cases and the loss is less, we are sure, than when cabbage or any similar vegetable is boiled in considerable water, and that boiled in considerable water, and that them keep, while without this process them in the jars and have the boiled in considerable water, and that them keep, while without this process they would not keep. water thrown away. Even cabbage, if cooked gently enough, requires but the least bit of water for the cooking after it has been plunged in balling water for a few minutes, then rinsed in cold water. That process seems to soften the cellulose of vegetables a great deal and so shortens the cooking

We are fond of comparing veretable cookery with the making of tea. Boiling water poured over dry tea draws out the flavor, but if the tea is boiled in the water then something objectionable happens, as everybody knows.

Now the water in fresh vegetables to an extent protects them from having their exesures drawn out guickly as

Doctor Found Women and Children Sick More Often than Men

As a family doctor at Monticello, Illinois, the whole human body, not any small part of it, was Dr. Caldwell's practice. More than half his "calls" were on women, children and bables. They are the ones most often sick. But their illnesses were usually of a minor nature—colds, fevers, headaches, biliousness—and all of them required first a thorough evacuation. They were constipated.

first a thorough evacuation. They were constipated.

In the course of Dr. Caldwell's 47 years' practice (he was graduated from Rush Medical College back in 1875), he found a good deal of success in such cases with a prescription of his own containing simple laxative herbs with pepsin. In 1892 he decided to use this formula in the manufacture of a medicine to be known as Dr. Caldwell's Syrup Pepsin, and in that year his prescription was first placed on the market.

The preparation immediately had as great a success in the drug stores as it previously had in Dr. Caldwell's private practice. Now, the third generation is

great a success in the drug stores as it previously had in Dr. Caldwell's private practice. Now, the third generation is using it. Mothers are giving it to their children who were given it by their mothers. Every second of the working day someone somewhere is going into a drug store to buy it. Millions of bottles of Dr. Caldwell's Syrup Pepsin are being used a year.

Its great success is based on merit, on repeated buying, on one satisfied user telling another. There are thousands of homes in this country that are never without a bottle of Dr. Caldwell's Syrup Pepsin, keep a bottle in your home, where many live someone is sure to need it quickly.

We would be glad to have you prove at our expense how much Dr. Caldwell's Syrup Pepsin, and we have gotten many hundreds of letters from grateful people telling us that it helped them when everything else failed.

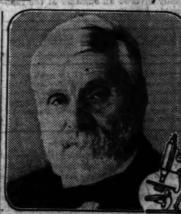

While women, children and elderly people are especially benefited by Dr.

When Baby Cor

There are many ways a baby has of expressing any pairregularity or digression from its normal condition of hand happiness. A short sharp cry, a prolonged irritated Restleames, a constant turning of the head or of the body, fretful. In these and other ways a baby tells you a something wrong. Most mothers know that a disconstiguach, or bowels that do not act naturally are the cammost of baby's sufferings. A call for the doctor is the thought, but in the event of any delay there should be a to hand a safe remedy such as Fletcher's Castoria.

Castoria has been used for baby's aliments for over 30 yeard has merited the good will of the family physician it measure not equaled by any other baby's medicine because its harmlessness and the good results achieved.

And remember this: Castoria is essentially a baby's remedand not a cure-all for every member of the family. What might belt you is too often dangerous when given to a babe.

of the neck. When she stands now she sees an almost hunched shoulder.

"I'm not old enough yet to be numbered among the has beens," she says. Like the cure for freckles, there's nothing like prevention in the first place. The other day I recommended a preventive movement for this very round-shoulderedness to which so many business women are victima. I gave it in connection with the eye rest treatment which is simply walking to the window and releasing the eye strain with a minute or two of long distance gazing. While the eyes are being given their moment's rejuvenation treatment, straighten the shoulders and pull in a few deep breaths of ozone. If, by any chance, one is not privileged to go walk to a window and gaze out during the business day, stand up for a moment or two at the desk and straighten up.

It is simply startling the difference in years that a straight back makes. In young women possibly it is not sotiled so much, but any woman after thirty, who can employ the trick of solding herself so erectly all of the time that there'll be neither curve to shoulders nor flesh pads thereon and so assured that she is getting away with anywhere from three to ten years.

Another excellent movement is to lie flat on your back on the floor and, without lifting heals or hands, carry your head forward on chest as far as you can. This gives a hard pull on the muscles between the shoulder hindes. After you've done this tan times, turn over and lie flat on the stomach with hands down at sides, raise the head backward as far as it will go. One month's twice daily practice of these three exercises will surely from out the thickened pad of flesh.

NEW YORK—[Special Correspondence.]—The well—[b]redingote! Such might be the testimony given in fa-vor of the redingote which, always more or less employed by the Parisian conturiers, has come in this fall for an unusual amount of attention. For always this style of dress conveys a certain suggestion of dignity, charm, and breeding. for early autumn days. It is fash ioned of brown crepella and opens over a vestee of pinky beige in the same material. The development of the skirt with its yoke effect and its front panel opening to show the beige under-skirt is most arresting. And the boy-ish collar of pinky beige is given new interest through the addition of a bow of the dress material. This bow is piped in the lighter shade, as is also the V-shaped opening of the corsage.

Crepella is used widely for these lit-

Guarding a Schoolgirl Complexion

By VILMA BANKY

Use only true complexion soap -in this way

That child, unlike the one we were talking of yesterday, does not have to be urged to say, "I'm sorry." In fact, he will do anything to dispel the clouds of displeasure or pain. Then, the apology made and forgiveness granted, the slate is clean and the sun shines again. That is all he wants.

"It's all right for a child to be sorry. But to be too easily and lightly sorry and as easily and lightly forgiven has its disadvantages.

"But what can you do?" saks a puzzled mother. "When a child says to you, 'I'm so sorry, mother—please excuse me,' and means it, you've got to accept it ungrudgingly, haven't you?" When that happens you might say

THE secret of a good complexion rests largely on two factors: Keeping the skin clean, the pores open and using ONLY a true complexion soap ever on the face.

A soap may be excellent for a thousand purposes, yet be too harsh for the skin. Good complexions are often thus imperiled.

Hence, largely on expert advice, thousands use Palmolive Soap. A soap made solely for ONE purpose—to safeguard good complexions. A beauty soap you know is safe to use.

Wash your face gently with Palmolive. Massage its balmy lather

with warm water, then with cold. Do this regularly and particularly in the evening.

That rule is credited with more beautiful skins than any other known. Use powder, rouge, make-up all you wish. But never let them remain over night. Follow one week, then sote the difference in your skin.

Get Palmolive today. But be sure it is GENUINE Palmolive. Costs but 10c a cake.

Soaps represented as of palm and office oils without the Palmolive name are usually crude imitations. So take care. The Ealmolive-Peet Co., Chicago, U. S. A. (Advertisement)
